Yes	10.8%
No	84.3%
Don't know/refused (vol.)	4.8%

Sex: [INTERVIEWER CODE]

Male	51.8%
Female	48.2%

Thank you very much for your help with this survey.

How This Survey Was Conducted:

Results of this Christopher Newport University/*Virginian-Pilot*/WVEC-TV poll are based on landline telephone and cell phone interviews conducted October 15-21, 2010 among a sample of 490 likely November 2nd voters in the 2nd Congressional District of Virginia. Likely voters are voters who are registered to vote and say they plan to vote in the upcoming election. Results reported here are weighted on sex, age, and race. Percentages may not equal 100 due to rounding. Results for the full sample have a margin of error of plus or minus 4.4% at the 95% confidence level. This means for the full sample we can be 95% confident that the error attributable to sampling and other random effects is plus or minus 4.4%. In addition to sampling error, the other potential sources of error include non-response, question wording, and interviewer error. For subgroups the margin of error would be higher. The poll was designed by the Wason Center for Public Policy at CNU and interviews were conducted by the Virginia Tech Center for Survey Research. Both the landline and cell phone samples were provided by ASDE. Interviews were conducted in English. For information or requests, contact Dr. Quentin Kidd, at (757) 594-8499 or qkidd@cnu.edu.
